LIMITS

The Squeeze Theorem

Click a hypothesis to see what it does.

IF

1. $g(x) \leq f(x) \leq h(x)$ for all x near a
   CLICK: DROP IT
2. $\lim_{x \to a} g(x) = \lim_{x \to a} h(x) = L$
   CLICK: DROP IT

$\Longrightarrow$

THEN

$\lim_{x \to a} f(x) = L$

The function has nowhere to go but L.
