INVERSE OF THE RESTRICTED COSINE

Profile of arccosine

$y = \arccos(x)$

[-1, 1] DOMAIN

[0, π] RANGE

KEY POINTS

1 ENDPOINTS
$(-1, \pi), (1, 0)$

2 MIDDLE
$(0, \pi/2)$

3 AT X = ±½
$2\pi/3$ and $\pi/3$

GLOBAL

DOMAIN
$[-1, 1]$

RANGE
$[0, \pi]$
never a negative angle

NEGATIVE INPUTS
$\arccos(-x) = \pi - \arccos x$
not odd: the output is supplemented

WITH ARCSINE
$\arcsin x + \arccos x = \frac{\pi}{2}$
