$$\begin{bmatrix} 1 & 4 \\ -2 & 3 \\ 0 & 5 \end{bmatrix} + \begin{bmatrix} 3 & -1 \\ 6 & 0 \\ 2 & -4 \end{bmatrix} = \begin{bmatrix} 4 & 3 \\ 4 & 3 \\ 2 & 1 \end{bmatrix}$$

Same shape in, same shape out: each entry of the sum is the two entries in that position added, one position at a time.
